

## ASX RELEASE

### KEY MANAGEMENT ADDITION

**6<sup>th</sup> July 2010**

KUTh Energy Limited (KUTh) announced today that it had appointed Mr James Randle to the position of Director of Projects effective from 1<sup>st</sup> August 2010.

Jim, who holds a Bachelor of Science (Hons) in Mechanical Engineering has been involved in the power industry for the last 30 years. He has considerable experience in the front end development of new geothermal projects. In the last 20 years Jim has been specifically focussed on the appraisal, development and project management of geothermal projects across Africa, Latin America, Indonesia, Philippines and New Zealand.

Jim is a Fellow of the Institute of Mechanical Engineers (UK), a member of the Institute of Professional Engineers (NZ), a Chartered Engineer (UK) and Registered Engineer (NZ). Jim has built up a wealth of knowledge in the power industry and particularly across a broad spectrum of the geothermal development chain. This will be a major asset for KUTh as it further develops its geothermal projects.

Commenting on the appointment Managing Director David McDonald said, "We are delighted to have Jim join the KUTh team. There is no doubt that his experience will strongly complement the first class exploration team that we have assembled. We have been searching for some time to identify the next stage engineering and project management personnel who will be important as we move into the next phase of our development. Jim is an ideal candidate and the fact that his last 7 years have been spent hands-on from concept, to build and operate a geothermal plant in Nicaragua is perfect for our emerging projects in Tasmania and Vanuatu .

"KUTh is making excellent progress on its Vanuatu project and the addition of Jim Randle to the team will help to provide a focus and skill set that will allow this project to be developed through the next phase of drilling and power plant evaluation. Jim's previous role with Sinclair Knight Merz Ltd in New Zealand has provided wide exposure to the international geothermal industry and will hold KUTh in good stead for new project development."
