Demag Plastics Group SP. z.o.o. wins gold medal at PlatinumPlast Gala

Going for gold with activeFlowBalance

At Plastpol 2014, Demag Plastics Group SP z.o.o. was awarded with a gold medal for the innovative activeFlowBalance technology module, which was integrated into an all-electric IntElect injection moulding machine.

The high-tech module was chosen from a pool of products exhibited at the Plastpol trade show in Kielce, Poland, by an independent jury, which was spearheaded by Prof. Joseph Koszkuł of the Technical University of Tschenstochau (Częstochowa). Demag Plastics Group was awarded with a PlatinumPlast model for the best technology in the area of injection moulding machines. Dipl.-Ing. Tomasz Tybura, Managing Director of Demag Plastics Group SP. z.o.o. accepted the award with pride.

The activeFlowBalance module is designed to balance uneven movements of multi-cavity moulds. It is used on IntElect all-electric machines to prevent the occurrence of negative effects such as flashing, underfilling and mould damage.

Demag Plastics Group SP. z.o.o.

Demag Plastics Group SP. z.o.o., a subsidiary of Sumitomo (SHI) Demag Plastics Machinery, has been established in the Polish market for injection moulding machines since 2004. As founder and co-owner of the former Demag representation Dematech, Dipl.-Ing. Tomasz Tybura, Managing Director of Demag Plastics Group SP. z.o.o., has been looking after customers with Sumitomo (SHI) Demag machines for years.

At its headquarters in Czestochowa, situated about 230 km from Warsaw, Demag Plastics Group SP. z.o.o. also offers customer instruction and training seminars as well as machine presentations, mould acceptance processes and customer trials.

A team of thirteen Demag Plastic Group employees is working for Tomasz Tybura in Poland. Sales engineers and service staff are mainly active at the three largest centres of the Polish plastics processing industry in Silesia, Warsaw/Lodz and Bydgoszcz/Poznan.
