the hard African earth.

www.crushco.za.com

We provide our clients the benefit of the highest quality **complete crusher solutions**, equipping you to crush the hard African earth.

Crushco Engineering is considered one of South Africa's best alternative crusher repairers, repairing and reconditioning crushers at competitive prices and expedited lead times.

It's our business to get you up and running **fast and effortlessly** and repair your crusher to the highest standard.

We supply alternative **spares and wear parts** for most machine makes. Focusing on providing the best quality, delivered in time, on time, every time.

Crushco Engineering also provide complete **equipment solutions** according to your requirements.

REPAIRS

We're considered South Africa's **best alternative crusher repairer**.

We've built our reputation through consistently and repeatedly repairing crushers fast and efficiently, with high quality standards and in the best possible lead times.

We understand the critical nature of repairs and offer the most reputable solution as an alternative crusher repairer.

When a company entrusts us with their repair process, our focus spans further than only the repair at hand and we assist to extend the life expectancy, eliminating down-time and avoid unnecessary break-downs or failures.

Whether it's a complete overhaul or a crisis repair, Crushco Engineering's staff is committed to providing repair and reconditioning solutions at competitive prices and expedited lead times.

WEARS & SPARES

REVOLUTIONIZE THE WAY YOU PROCURE AND MANAGE YOUR WEAR PARTS.

We've made it our mission to procure and produce the highest quality crusher spares & wears, both locally and internationally.

We produce and supply a full range of castings and spares for almost all types and manufacturers of crushers. We also offer a vast selection of crusher components to fit most of the major crusher manufacturer's machines, from the early designed 'classic' crushers through too today's modern high speed/high volume machines. We can offer standard designs or work with clients to produce special-ised designs to maximize liner life. Years of industry experience, provides our clients with solutions in a wide range of cast alloys to meet almost any need. The extensive range of quality crusher parts is available in all the most frequently used grades of manganese steel, several High Chrome Irons and Martensitic grades are also available for supply.

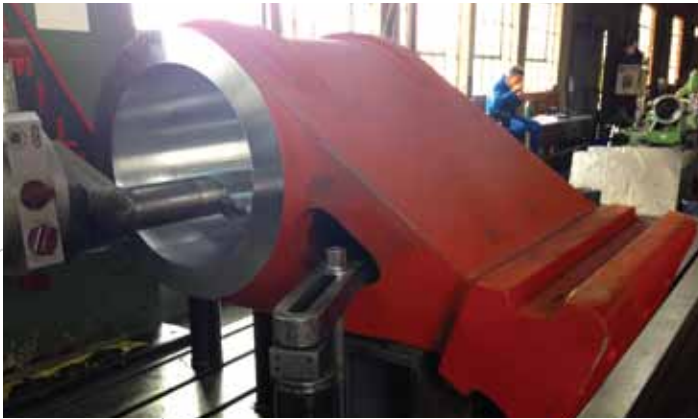

Each spare or wear part produced or procured by us carries the WEARPARTS.CO stamp of quality approval.

This means we provide the **best quality**, delivered **in time, on time, every time**.

EQUIPMENT

We provide equipment solutions through our reputable local and international network of equipment manufacturers.
