

PRESS RELEASE BY PATERSON SIMONS & CO. (AFRICA) LTD.

17 FEBRUARY 2015

First Grove GMK6400 Sold into Africa.

Mobicrane is a leading supplier of lifting equipment to the mining, oil and gas service industries in Ghana and the wider region. Paterson Simons, the dealers for Manitowoc Grove amongst others, recently handed over a GMK6400 (400MT), Manitowoc Grove's flagship model, to Mobicrane at Manitowoc Grove in Wilhelmshaven, Germany. This is not only the largest new mobile crane ever sold by Paterson Simons, but it will also be the first GMK6400 in Africa, testament to the high standard of lifting equipment now required by customers and end users in the region. To ensure seamless on-the-ground service Paterson Simons sent a senior engineer to Germany for GMK6400 specific rigging and diagnostic training and further training has been conducted in Ghana by trainers from the factory.
