For Immediate Publication

19th March 2015

New Blasthole Drills Mobile App for the Pit Viper Series

From the open pit to the palm of your hand, Atlas Copco is bringing the Pit Viper blasthole drill series to your Apple tablet and mobile device. The new app focuses on Atlas Copco's Pit Viper blasthole drills, with the latest case stories, product information, and interactive 3D models

The application was designed to better illustrate the features and benefits of Atlas Copco's Pit Viper series, so customers and salesman around the world can use it on the go, with or without internet access. Users can interact with each model to see a variety of features and benefits related to safety, productivity, serviceability and fuel consumption.

The goal of this app is to give our customers and sales team a more hands-on tool, a better understanding of components, and ability to request more information on a particular product at any time.

A design that's simple to use, our users will be able to interact with the Pit Viper series, read up on information regarding the DM blasthole series and our Rig Control System (RCS), and stay up-to-date with the latest that Atlas Copco has to offer to the blasthole drilling market.

Download the app now: [Pit Viper Mobile App](#)
