

RS Components offers optimum selection of PPE equipment at the Matla Mining and Technical Exhibition

The RS personal protection offering includes a selection of gloves, eyewear, respiratory and hearing protection

Johannesburg, South Africa, 06 March, 2018 - **RS Components** the global distributor for engineers, buyers and maintenance professionals will be at the Matla Mining and Technical Exhibition (MTE) on 08 March 2018, at the Matla Coal Sports Field in Mpumalanga, exhibiting a range of Personal Protection Equipment (PPE). The RS personal protection equipment range includes: products from **3M Peltor** such as **eyewear** designed for maximum comfort, fit and clarity, so they stay on and you stay protected; ear protection, **hearing defenders** that are ideal for use in environments with moderate industrial noise, such as workshops and **respirators** with improved filter construction and a cool flow valve for comfort and easy breathing.

The Mpumalanga province accounts for 83% of South Africa's coal production. The Matla mining complex comprises three mines, which produce 14Mtpa of the power station coal and employ 2500 permanent employees and contractors. The mine is a fully mechanised underground mine, employing continuous mining and short-wall methods. It has coal reserves amounting to 297.3million tonnes of coking coal, one of the largest coal reserves in Africa and the world.

Specification of the correct PPE equipment should never be taken lightly. Application of the correct equipment for the job could be the difference between safe operation and life-changing injuries - one of the reasons why RS will be available at the MTE Matla show is to showcase customers the various global brands that specialise in personal protection gear and site safety equipment.

RS Components will also display the RS Pro range of personal protection equipment which is rigorously tested & backed by the RS Seal of Approval. This range is exclusively available from RS Components and offers great quality and performance at an affordable price.
